

PDF Viewer Test 01: Basic Text

This is a plain single-page document with three paragraphs of left-aligned body text, used as the baseline smoke test: open, decode, draw, close. If this file does not render correctly, nothing else in this set is worth debugging first.

Second paragraph, to check that line spacing and multiple text blocks on one page behave. Nothing exotic here: no images, no rotation, no custom colorspace, just Helvetica at 12pt.

Third paragraph ends the page. abcdefghijklmnopqrstuvwxyz
ABCDEFGHIJKLMNOPQRSTUVWXYZ 0123456789 !?.,;()[]{}
